Figure 1

Trends in Instructional Staff Employment Status, 1975 and 1976 to 2011

Notes: Figures in this chart have been updated from those published by AAUP in 2013. 1975-76: Figures for full-time faculty are for 1975 and are estimated; all other figures are for 1976. For 1976, full-time and part-time graduate student employees are included; in later years all were part-time by definition.

Definitions and Data Source Citations

Definitions

Most terms used in this report are drawn from the original data sources. The following terms are specific to this tabulation:

Instructional Staff. Includes all full- and part-time faculty members and graduate student employees.

Graduate Student Employees. Individuals included in this category are only those who are reported in the employment survey under the label “graduate assistants” or “instruction/research assistants.” Defined as part-time employees beginning in the mid-1980s.

Faculty. Includes all full- and part-time faculty members.

Contingent. Includes the following employment categories, as appropriate for the specific table: full-time non-tenure-track faculty members, part-time faculty members, and graduate student employees.

See the fall 2011 analysis section for details of institutional categories used.

Data Source Citations

With regard to the sources for data, this report can be divided into two sections: the historical trend going back to 1975 and 1976, and the data for fall 2011. All data are drawn from the US Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), “Fall Staff” component. (Data for 1975 and 1976 were from the predecessor data collection, the Higher Education General Information Survey [HEGIS].) IPEDS is a comprehensive census of all employees in higher education, as well as other institutional data components. Because institutions are mandated to provide accurate data for IPEDS in order to maintain eligibility for federal funding, IPEDS represents the most comprehensive source of data available.

Prior to 2002, the Fall Staff collection was the only comprehensive source for data on instructional staff employment status, and was completed in odd-numbered years. Beginning with 2002, IPEDS included a new Employees by Assigned Position (EAP) component. The EAP and Fall Staff components differ in the institutions included, so in order to maintain continuity for the historical trend analysis, only Fall Staff figures for odd-numbered years are included. Data for years between 1975-76 and 1989, as well as 1991 and 1997, were not available.

Historical trend data

The historical data used to produce figures 1 and 2 and tables 1 through 4 were compiled from published sources wherever possible, and the table below provides specific sources. The data for 2011 used in those figures and tables were produced as described in the following section. All publications referenced below are from the US Department of Education, National Center for Education Statistics (<http://nces.ed.gov/pubsearch/getpubcats.asp?sid=010>).

Sources for Historical Trends Data

Year	Item	Source
1975 and 1989	Full-time faculty by tenure status	Total count of full-time faculty and percentages by race/ethnicity are from <i>Fall Staff in Postsecondary Institutions 1993</i> , table 9, page 27. Percent breakdown by tenure status and race/ethnicity is in table 10, page 29. These figures were used to construct the overall estimate by tenure status.

Fall 2011 analysis

As of publication time, the National Center for Education Statistics has not yet published tabulations of employment status for 2011 that include full-time faculty members broken out by tenure status. Given the importance of tracking the ongoing shift toward contingent appointments among instructional staff members, the author undertook a comprehensive tabulation to serve as a resource for all interested individuals. A further objective of this report is to provide tabulations of employment status by race and ethnicity, and by the combination of race or ethnicity with gender, in a comprehensive and accessible format.

The IPEDS EAP data collection provides the option to tabulate data only for staff members employed outside medical schools, which would be preferable for most purposes. However, EAP does not provide data disaggregated by race or ethnicity. Therefore, the fall 2011 analysis is drawn from the “Fall Staff” data files, which include employees of medical schools.

The analysis was completed on raw data files downloaded from the IPEDS Data Center (<http://nces.ed.gov/ipeds/datacenter/>). The 2011 Staff files utilized are the “final/revised” files released in December, 2013, and downloaded in early March, 2014. Tenure status for full-time instructional faculty members is available only in the “section F” file; data for other staff members is from the “section ABD” file.

The institutional records selected for the analysis are those listed as degree-granting and participating in federal Title IV financial aid programs. (The use of the Title IV criterion is typical in NCES published tabulations, and serves as a proxy for institutional accreditation. The accreditation variable available from the IPEDS file is not necessarily complete and up-to-date.) Selection of institutional records is based on data from the fall 2011 IPEDS Institutional Characteristics component, specifically the header (HD) records file. Table A1 shows the distribution of institutions selected for analysis. Report tables that are broken out by “institutional category” utilize a single category variable combining the Carnegie 2010 basic classification and control. Tables by “institution type” utilize a collapsed version of the Carnegie 2010 classification.

Table A1

Institutions included in the tabulations, fall 2011

	Public		Private Non-Profit		Private For-Profit		All	
	No.	%	No.	%	No.	%	No.	%
